

FY 2005-07 REPORTING FORMAT FOR PESTICIDE WORKER SAFETY

1A. Report the total number of tips/complaints investigated by the State/Tribe that involved alleged occupational pesticide exposure or illness. This would include any complaint that alleged a pesticide exposure or illness occurred in connection with employment or work activities (including agricultural and non-agricultural settings).	<u>Total Number of Complaints</u>	
1B. For the complaint investigations reported in #1A above, please indicate the number that were associated with agricultural versus non-agricultural occupations;	<u>Agricultural</u>	<u>Non-Agricultural</u>
1C. For the complaint investigations reported in #1A above, please indicate the number that were associated with misuse or label violations versus the number that appeared to have resulted from use according to the label (this determination would be based on whether there was an enforcement action and the nature of such action);	<u># Assoc. w/ Violation</u>	<u># Assoc. w/ No Violation</u>
1D. For the complaint investigations reported above in #1C that were associated with misuse or label violations, please indicate the number of these associated with a WPS violation versus other violation;	<u>WPS Violation</u>	<u>Other Type Violation</u>
1E. For the complaint investigations reported above in #1C that were associated with misuse or label violations, please indicate the nature of the violations and number of each type (i.e., 7 PPE violations, 2 REI violations, 2 drift violations, 1 posting violation, etc.).	<u>Nature of Violations and Numbers of Each Type</u>	
2. Report the number of pesticide incidents that were reported to the State/Tribal public health agency (or the appropriate entity having jurisdiction over pesticide incident reporting) that involved occupational pesticide exposure or illness. [NOTE: EPA is seeking the total number reported annually.]	<u>Total Number of Incidents Reported Annually</u>	
3. Report the top three priorities States/Tribes have established for worker protection outreach and compliance monitoring activities (through their targeting efforts done in connection with OECA's guidance or through their own targeting strategy effort or priority setting process).	<u>Top 3 WPS Priorities</u>	
4. Report on any new WPS-related outreach or compliance assistance materials, and any new WPS worker or handler training materials developed in FY 2005-07 which have been particularly useful or well-received. If applicable, report by submitting sample copies to EPA through the Regional WPS contact.	Please submit copies of any applicable materials to EPA through the Regional WPS contact	
5. Report on the number of sub-agreements the State/Tribe currently has with WPS training providers that issue WPS training verification cards, and report the total number of worker/handler verification cards issued to training providers.	<u># of Agreements</u>	<u># of Cards Issued</u>
6. Report on any new and noteworthy pesticide applicator training materials developed in FY 2005-07 (including web-based training programs) [NOTE: The State/Tribe should also put this information on the national C&T resources website: < http://pep.wsu.edu/psp/scripts/menu.asp >]	<u>List and Briefly Describe Materials</u>	

NOTE: In addition to the pesticide worker safety reporting requirements outlined above, States/Tribes must also separately submit their annual C&T report as required under 40 CFR Part 171 (Section 171.7(d)). Please see Item #7 in the reporting section of the pesticide worker safety guidance. In FY 2005 - 07, States/Tribes must use the C&T State Plan and Reporting database system for the submission of the annual C&T reporting information noted in item #7 above. Use of the C&T State Plan and Reporting database will automatically generate an annual C&T report that contains all of the required information noted in item #7 above. Failure to provide the annual C&T report may affect future funding levels since this reporting information is used in EPA's funding formula.
